

To clear your browser cache. If you are using Chrome (recommended):

1. Click on the three dots in the far upper Right corner
2. Choose "Settings"
3. Choose "Privacy and security."
4. Choose "clear browsing data."
5. Make sure at least "Cached Images and files" is checked.

You can choose either basic or advanced.

I use advanced and select the top four options. I also use the time range of "All Time."

Make sure you uncheck "Password and other sign-in data" if you want to save your passwords

## Clear browsing data

Basic

Advanced

- Browsing history  
2,187 items
- Download history  
591 items
- Cookies and other site data  
From 1,161 sites (you won't be signed out of your Google Account)
- Cached images and files  
319 MB
- Passwords and other sign-in data  
90 passwords (for givingtrend.com, blackbaudhosting.com, and 88 more, synced)
